Revenue is recognized to the extent that it can be reliable, measured and is appropriate to the economic benefits that will flow to the company.

(a) Revenue Recognition for Sale of Goods

Revenue from the sale of goods is recognized when the significant risks & rewards of ownership of the goods are transferred to the customers and is stated net of rebates/trade discounts.

(b) Dividend

Dividend income is recognized if the right to receive the payment is established by the Balance Sheet date.

(c) Interest

Interest revenue is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

(g) Employee Benefits

(a) Short Term Employee Benefits

All employee benefits falling due wholly within twelve months of rendering the service are classified as short term employee benefits. The benefits like salaries, wages etc are recognized in the period in which the employee renders the related service.

(b) Post-Employment Benefits

(i) **Defined Contribution Plans:** The State governed provident fund scheme are defined contribution plans. The contribution paid/payable under the schemes is recognized during the period in which the employee renders the related service.

(ii) Post-Employment Benefits

The Gratuity liability payable under the payment of Gratuity Act, 1972, provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee salary and tenure of employment. The Liability to pay arises once an employee completes five years of tenure of service in an organization. It is paid/payable to employee at the time of retirement or on resignation, or on death to his dependents. Wherever applicable, the present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

Since there is no employee during the financial year, no actuarial valuation as per Project Unit Cost Method has been carried out.

The company does have en-cashable leave encashment policy, however considering that there are no employees during the period, no provision has been made during the financial year ending 31st March, 2014 on actuarial basis. There are no other en-cashable short term benefits.

AMRIT AGRO INDUSTRIES LIMITED

(h) Cash Flow Statement

Cash flows are reported using the indirect method, whereby net profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated. The Cash Flow statement is separately attached with the Financial Statements of the company.

(i) Provisions & Contingency

Provisions are recognized when the Company has a present obligation as a result of past events, for which it is probable that an outflow of resources embodying economic benefits will be required to settle are reviewed regularly and are adjusted where necessary to reflect the current best estimates of the obligation. Where the Company expects a provision to be reimbursed, the reimbursement is recognized as a separate Asset, only when such reimbursement is virtually certain. Contingent Liabilities are disclosed after an evaluation of the facts and legal aspects of the matters involved. Contingent Assets are neither recognized, nor disclosed. Provisions, Contingent Liabilities and Contingent Assets are reviewed at each Balance Sheet.

(j) Impairment

The carrying amount of assets is reviewed at each balance date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use. In assessing value in use the estimated future cash flows are discounted to their present value at the weighted cost of capital.

(k) Use of Estimates

The preparation of the financial statements in conformity with GAAP requires the management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include provisions for doubtful debts, future obligations under employee retirement benefit plans, income tax, post-sales customer support and the useful lives of fixed assets and intangible assets. Actual results could differ from those estimates. Any revision to accounting estimate is recognized prospectively in the current and future periods.

(l) Earning Per Share

In determining earnings per share, the Company considers the net profit after tax and includes the post-tax effect of any extraordinary / exceptional item. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the period. The number of shares used in computing diluted earnings per share comprises the weighted average shares considered for deriving basic earnings per share, and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares.

The details are stated in the financial notes below which are not reproduced here. There is no diluted Earning per Share as there are no dilutive potential equity shares.

(m) Income Tax & Deferred Tax

The current charge for Income Tax is ascertained on the basis of assessable profits computed in accordance with the provisions of the Income Tax Act, 1961.

AMRIT AGRO INDUSTRIES LIMITED

Minimum Alternate Tax ("MAT") paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an Asset if there is convincing evidence that company will pay normal tax in future. MAT Credit entitlement can be carried forward and utilized for a period of ten years from the year in which the same is availed. Accordingly, it is recognized as an asset in the balance sheet when it is probable that the future economic benefit associated with it will flow to the company and the asset can be measured reliably.

Deferred tax is recognized subject to the consideration of prudence, on timing differences, being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to timing differences that result between taxable profits and accounting profits. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date. Deferred tax assets on timing difference are recognized only if there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. However, deferred tax assets on the timing differences when unabsorbed depreciation and losses carried forward exist, are recognized only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax can be realized. Deferred tax assets are reassessed for the appropriateness of their respective carrying values at each balance sheet date.

(n) Leases

- (i) Assets acquired under leases where the Company has substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at the inception of the lease at the lower of the fair value or the present value of minimum lease payments and a liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost, so as to obtain a constant periodic rate of interest on the outstanding liability for each period.
- (ii) Assets taken on lease under which lessor effectively retains all significant risks & rewards of ownership have been classified as operating lease. Lease payments made under operating lease are recognized as expense in the statement of profit & loss on straight line basis over the primary term of the lease as mentioned in the lease agreement on accrual basis.
- (iii) Assets given under a finance lease are recognized as receivable at an amount equal to the net investment in the lease. Lease income is recognized over the period of the lease so as to yield a constant rate of return on the net investment in the lease.
- (iv) Assets leased out under operating leases are capitalized. Rental income is recognized on accrual basis over the lease term.
- (v) Initial direct costs relating to assets given on finance leases are charged to Statement of Profit and Loss.
